

# BLOCKCHAIN

Complicated business interactions are frequently inefficient, especially when partners need to cooperate but lack a trustworthy centralized authority. Compounded by a lack of transparency, automation capabilities, and auditing elements, these situations prove a need for a blockchain solution. While blockchain can streamline, simplify, and improve overall operations, these solutions are technologically complex and difficult to implement without experience.

With SoftServe, enterprises are empowered to navigate this next-generation business intelligence. We help define the most suitable blockchain technology, create blockchain networks, automate business processes, integrate blockchain platforms with existing business structures, and beta-test all changes.

## EXPERTISE IS ENSURED

### Mastery of Multiple Blockchain Technologies

Experts with hands-on experience with multiple blockchain technologies—Ethereum, Hyperledger, Corda, Quorum, and mvore—enable them to determine the best fit for different business needs.

### Enterprise-Focused Solutions

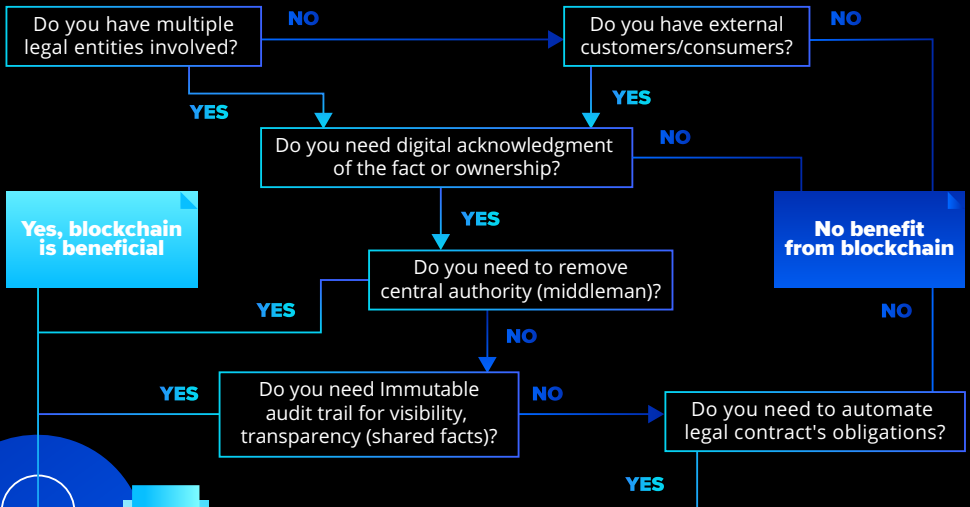

Our team is skilled in handling various elements such as private blockchains that require privacy and high levels of compliance with GDPR, HIPAA, or others.

### Quality from Start to Finish

Quality is built-in with design and implementation powered by the Software Engineering Institute's methodology and the ISO 25010 standard architecture.

## BLOCKCHAIN JUSTIFICATION

softserve

# SOFTSERVE'S PROCESS

## Modular Design

**TIMELINE:** Usually 2-4 hours, up to 1 day

- In-depth review to determine blockchain feasibility within existing business structure.
- Our experts then advise and educate internal stakeholders on the blockchain benefits to critical areas.

## Scanning Flexibility

**TIMELINE:** 1-2 weeks

- Analysis of organizational alignment and readiness for blockchain technology.
- Identification of all interactions and potential inefficiencies between multiple parties and within existing business processes.
- Proposal of the best long-term and short-term blockchain digital transformation strategies and smooth transition plan.

## Prototyping

**TIMELINE:** 5-6 weeks

- Business value proven by building a tailored blockchain use case for a key business system or process.
- Designed solution will provide any identified trade-offs, risks, and potential bottlenecks.

## Custom Solution Transformation

**TIMELINE:** Varies

- Final transformation roadmap defined with milestones and deliverables.
- Implementation and integration of end-to-end customized blockchain solution.
- Removal of high-cost manual tasks and responsibilities improves operations and streamlines processes.

## WHY SOFTSERVE?

### STABILITY

**27+**

Years of award-winning service

### EXPERIENCE

**10K+**

Complex project completed

### TRUST

**70 NPS**

Leads the industry

### YOU-CENTRIC

**100%**

Onsite, remote, or hybrid service delivery

### RETENTION

**90%**

Client retention (many for more than 20 years)

### SCALABILITY

**30%**

Organic CAGR five years running
