

INTELLIGENT DOCUMENT PROCESSING

Decrease manual efforts, dramatically reduce human error, cut costs, and increase workflow effectiveness and efficiency.

ENTERPRISE DOCUMENT PROCESSING CHALLENGES

High operational expenses

Numerous human errors

Wide array of data formats

Rule-based automation difficult with similar data formats.

Long turnaround times due to manual processes with large teams

SOFTSERVE SOLUTION

SoftServe's Intelligent Document Processing solution transforms vast amounts of unstructured or semi-structured information from your business documents into usable data in a variety of formats. This solution is customized for your specific business requirements while leveraging the latest natural language processing advancements to deliver tailored features, including specific formats, layouts, languages, volume, and industry-specific lexicon.

SOLUTION BENEFITS

8x Faster

Processes extremely large and complex document reconciliations 8x faster.

Over 95%

Reduces the amount of time spent extracting key information from documents into table database by over 95%.

Days Over Months

Decreases data extraction and processing from months to mere days.

Streamline Workflow

Increases and improves operational workflow, processing documents in a matter of seconds.

Data-Driven Decisions

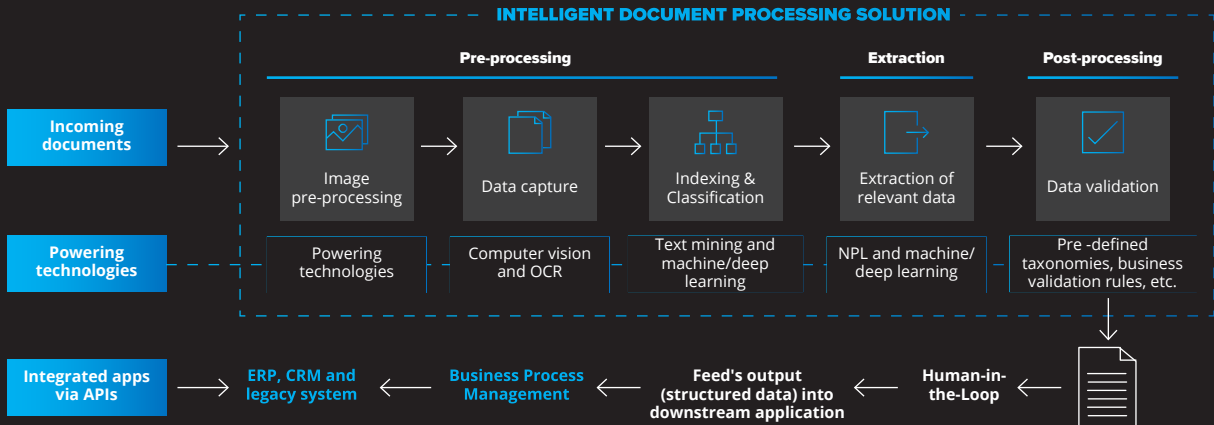

Greatly improves the time it takes for results validation, providing usable data more quickly to drive strategic business decisions.

Minimal Errors

Eliminates tedious and monotonous work leading to fewer human mistakes. Decreases machine-made errors by applying the latest OCR and text pre-processing approaches.

SOLUTION PROCESS

SOFTSERVE INTELLIGENT DOCUMENT PROCESSING OFFERS

Rapid AI Assessment

2 days

Determine business needs and objectives as well as existing processes.

Define the "to-be" state and craft potential solutions.

Advise on next steps.

Rapid Prototyping

4 weeks

Design proposed new architecture and select technology for document processing.

Identify dependencies and demonstrate splitting, classification, and extraction accuracy.

Evaluate HITL needs and review success criteria before confirming the final path for production.

WHY SOFTSERVE?

STABILITY

27+

Years of award-winning service

EXPERIENCE

10K+

Complex project competed

TRUST

70 NPS

Leads the industry

YOU-CENTRIC

100%

Onsite, remote, or hybrid service delivery

RETENTION

90%

Client retention (many for more than 20 years)

SCALABILITY

30%

Organic CAGR five years running
