

Boost App ROI by 30%

SOFTSERVE ADAPTIVE MODERNIZATION PLATFORM

Outdated applications fail to meet the demands of modern computing environments. With reduced security, limited scalability, and delayed time-to-market, legacy applications hurt your bottom line. Rapidly update and transform your legacy applications with SoftServe Adaptive Modernization Platform (SAMP) to quickly convert them from technical debt into revenue generators.

With SAMP, You Have an Auditable, Extendable and Customizable Solution for:

3-5x

faster
application modernization

30%

reduction
in infrastructure costs

5x

faster
time-to-market

Streamlined
application
portfolio

Improved
application
performance

Increased stability
with reduced risks
and cost

Competitiveness
in rapidly evolving
digital landscape

Why SAMP?

The customized in-house Platform as a Service (PaaS) seamlessly runs your applications.

You have complete accessibility through an Infrastructure-as-Code (IaC) deployment.

Rapid deployment

- **IaC with Terraform** and **custom automation**
- **Google Kubernetes Engine (GKE) core** built according to best practices, with support for **GKE Autopilot** or **Anthos**

Reliability and security

- **Defined standards** to complement interfaces
- Optimization for **cost-efficiency** and **sustainability**

Scalable flexibility

- **Modular structure** with solution-agnostic components using defined interfaces
- **Plugin compatibility** with any CI/CD process

The three stages of SAMP implementation

Container readiness
or strategy assessment

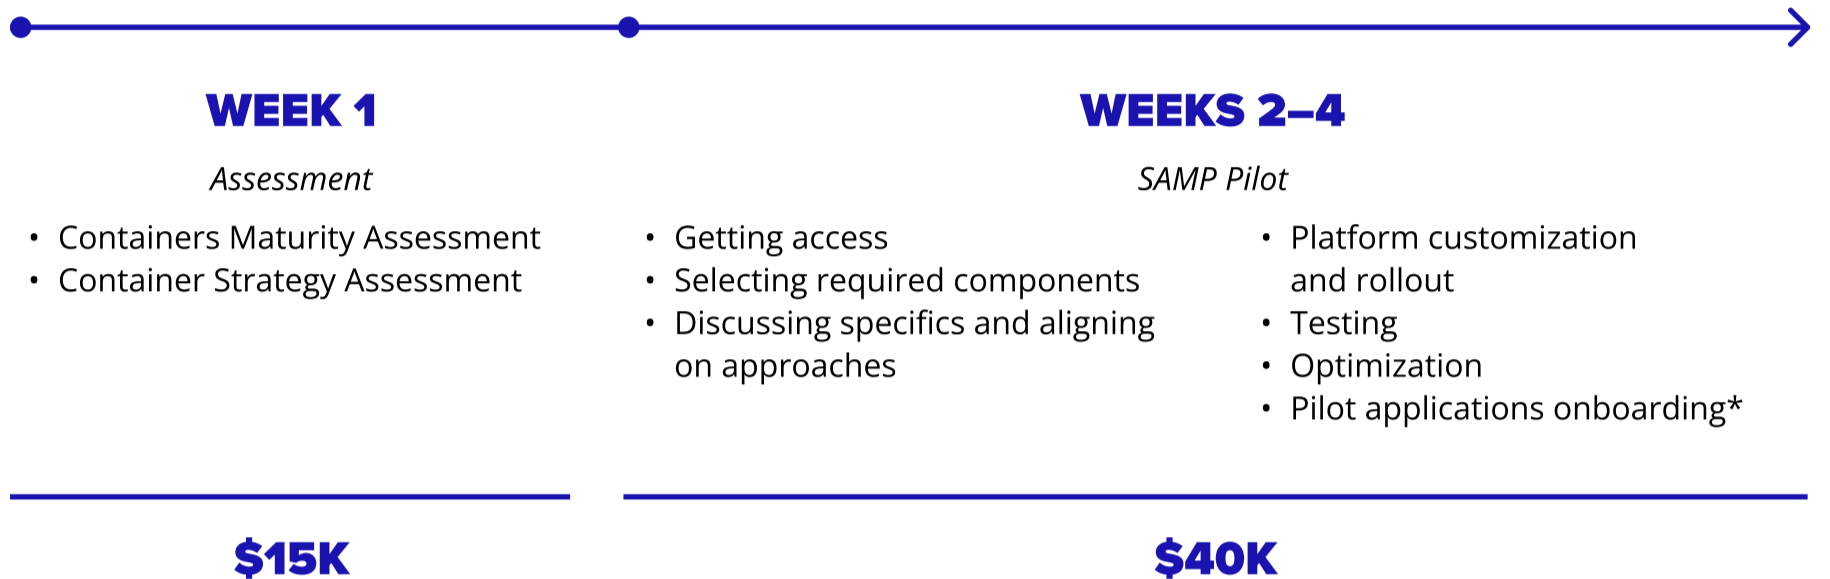

SAMP customization
and pilot rollout

Reassessment and
modernization at scale

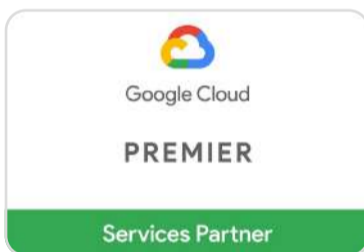

Preliminary Timeline

Depending on the scope, the timeline might take up to four weeks for SAMP Pilot.

* Pilot onboards 5-15 containerized applications, depending on complexity and other dependencies

Google Cloud Expertise

SoftServe, a Premier Google Cloud Service Partner, helps enterprises build the foundations for successful AI transformation and scale AI to meet bigger goals, faster. We work with organizations to break down silos, modernize applications, and turn fragmented data into a connected, AI-ready foundation. Whether you're scaling AI agents across your workforce or improving data quality for smarter, faster decisions, we bring the strategy, expertise, and technology to get you there.

Ready to build your foundation for successful AI transformation?
