DevIQ

IMPROVING AGILE SOFTWARE DELIVERY PROCESSES BY UP TO 20%. TANGIBLE RESULTS IN ONLY 10 DAYS, ALL AT A FIXED COST.

ARE YOUR PRODUCT TEAMS KEEPING UP WITH FEATURE DEMAND?

For over 30 years, software leaders have struggled with inefficiencies in their software development life cycle (SDLC). Too often, SDLC agility is hampered by bad data, inconsistency, complexity, and limited visibility. Pinpoint how to reduce these ongoing risks and costs and accelerate your digital journey by optimizing your SDLC processes with SoftServe's DevIQ Assessment — an end-to-end analysis of your software development process powered by process mining technology.

YOU ARE NOT ALONE

52% of product managers said their processes are ill-defined and unclear

85% of developer time is wasted because of inefficient processes

70% of software projects are late, over-budget, or don't ship

AN ENGAGEMENT MODEL THAT ACCELERATES YOUR DIGITAL JOURNEY

ASSESSMENT

Our agile and product management experts use process mining technology to assess and diagnose software development effectiveness.

OPTIMIZATION

Our consultants apply assessment outcomes and work with your team to improve agile processes, fill skills gaps, and tune the use of systems and tools.
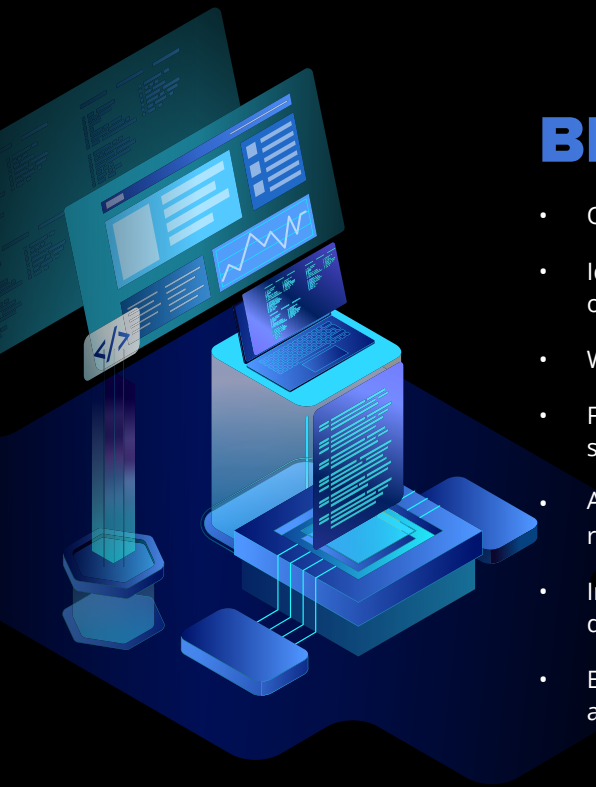

ACCELERATION

Use our processes and tools to maintain optimal levels of feature delivery, pursue new capabilities, and become an innovation leader.

DevIQ, Powered by

BENEFITS OF DevIQ

- Quickly assess your agile project portfolio roadblocks and inefficiencies

- Identify, propose, and deliver remediations to achieve persistent process optimization

- White glove, trusted advisor status through every step of the engagement

- Find more opportunities for your teams to pursue true innovation, not just struggle to keep up

- Achieve up to 20% in process savings through enhanced efficiency and reduced risk

- Increase predictability by providing a comprehensive view of your software development process

- Enhance decision-making about process improvements and resource allocations.

SoftServe DevIQ combines process visibility and SDLC advisory services to help you transform and optimize your software development processes, delivering more product features faster.

AGILE SDLC ADVISORY → **DevIQ** ← **PROCESS INTELLIGENCE ANALYSIS**

WHY SOFTSERVE

IT STABILITY	EXPERIENCE	TRUST
More than **30 YEARS** of award-winning service	**20,000+** complex projects completed	Our **84 NPS** leads the industry

YOU-CENTRIC	SCALABILITY	LOYALTY
100% remote, on prem, or hybrid delivery	**30%** CAGR — you won't outgrow us	**90%+** client retention (many for more than 20 years)
