GEN AI PRODUCTION ACCELERATOR

SEAMLESSLY SCALE YOUR GEN AI SUCCESS

SoftServe's Gen AI Production Accelerator is designed to transition successful Gen AI pilots into full-scale production with ease. This phase tackles the complexities of refining large language models (LLMs), integrating data and applications, and ensuring governance and compliance — all while preserving the agility and innovation from the pilot stage.

WHY GEN AI PRODUCTION ACCELERATOR?

Our structured methodology turns validated Gen AI use cases into robust, scalable solutions that deliver real business results. By leveraging our expertise in data integration, automated pipelines, and LLM customization, we provide a strong platform for organizations to maximize the value of their Gen AI investments and speed up the adoption of AI-driven capabilities across their operations.

KEY BENEFITS

SMOOTH TRANSITION TO PRODUCTION

Quickly move from pilot to production with minimal disruptions and faster time-to-value.

ENHANCED MODEL PERFORMANCE

Continuously refine LLMs for better accuracy, efficiency, and effectiveness in the real world.

COMPREHENSIVE INTEGRATION

Seamlessly integrate Gen AI with existing systems and third-party applications, improving operations.

SCALABILITY AND FLEXIBILITY

Build scalable, flexible Gen AI solutions that adapt to changing needs and drive long-term growth.

DRIVING BUSINESS VALUE

OPERATIONAL EFFICIENCY	Automate complex workflows with Gen AI, reducing manual effort and improving productivity.
ENHANCED CUSTOMER EXPERIENCES	Use Gen AI to deliver personalized, responsive interactions that drive satisfaction and loyalty.
DATA-DRIVEN INSIGHTS	Gain deeper insights with scalable Gen AI models for smarter, strategic decision-making.
NEW REVENUE STREAMS	Tap into new markets by developing innovative, Gen AI-driven products and services.

GEN AI SCALING UP
(6+ WEEKS)

ASSESSMENT (± 1 WEEK)

- PoC/pilot impact/outcome measurement
- Production requirements gathering
- LLM refinement requirements
- Production solution vision
- Solution architecture roadmap

PRODUCTION (ASK FOR QUOTATION)

- Data integration and automated pipeline implementation
- LLM enhancement LLMOps deployment
- Integration with third-party applications
- Implementation of guardrails
- Test, validate, and implement production-ready deployment

SUPPORT

- Continual development and integration roadmap
- Additional application requirements and roadmap
- LLM refinement and benchmarking

NOT READY FOR PRODUCTION YET?
