MODERNIZATION
FOR VMWARE WORKLOADS

MARKET CHALLENGE

The Broadcom acquisition of VMWare has led many organizations to consider migrating to alternative platforms. However, they face significant challenges, such as limited availability and expertise within their teams, uncertainty about where to begin, and concerns regarding security and compliance. Looming license renewal deadlines add further pressure. Organizations looking for an alternative to the lift and shift approach often wish to consider a modernization strategy for a safe and reliable infrastructure migration.

SoftServe, a premier IT consulting and digital services provider, has the tools and expertise to make it easy for customers to migrate to both the cloud and alternative infrastructure such as OpenShift or Nutanix. We can help our customers save 25% or more in migration costs, reduce risks associated with migrations, and establish a cost-effective platform engineering strategy for ongoing savings and ROI.

BUSINESS VALUE

Optimize costs by paying just for what you use and scale in, out, up, and down

Reduce management overhead by undertaking managed services

Enhance your security posture and compliance

Simplify and enhance your disaster recovery and business continuity processes

Increase business agility and time to market

Empower your business through modern application development

Make your business more sustainable

Maintain and support post-migration

HOW DOES IT WORK?

Begin with a flexible assessment focusing on your organization's priorities and considering the best migration paths.

Use SoftServe's accelerators for modernization and migration, such as:

- Best-practices infrastructure configuration addressing security, compliance, and regulatory requirements.
- Well-architected SoftServe Application Modernization Platform for container and microservices application architectures.
- CAST SME-less application assessment.
- Unique SoftServe tools to better understand and optimize future infrastructure costs.
- Unique SoftServe modernization frameworks.
- 3rd party funding programs unique to SoftServe to help offset your costs.

Transfer your VMWare skills to cloud skills and get your teams cloud certified.

Include an optional pre-validation pilot.

Rely on proven SoftServe migration accelerators with safe and fast rollback.

Benefit from post-migration maintenance and support.

WHAT DO YOU GET?

ASSESSMENT

- A business case by running a rapid assessment using automation tools like CAST Highlight and CAST Imaging
- Infrastructure evaluation
- Migration and modernization plan

MIGRATION & MODERNIZATION

- Migrated and modernized workloads to cloud and optional managed services using SoftServe's Migration Factory
- Upskilled team

MANAGE
(Optional)

- A highly skilled and flexible SoftServe Managed Services team to look after the infrastructure.
