

# VMWARE MIGRATION FACTORY

## LIFT AND SHIFT FOR VMWARE WORKLOADS

### MARKET CHALLENGE

The Broadcom acquisition of VMWare has led many organizations to consider migrating to AWS Cloud and adopting cloud-native services. However, they face significant challenges, such as limited AWS expertise within their teams, uncertainty about where to begin, and concerns regarding security and compliance. Looming license renewal deadlines add further pressure. Organizations can act quickly by adopting a lift and shift approach to reliably and safely migrate their infrastructure.

SoftServe, a Premier Tier Services AWS Partner, has over 500 AWS-certified experts, 12 AWS Competencies, and numerous service delivery programs. We make it easy for customers to migrate to AWS Cloud, minimizing the risks associated with lift and shift migrations.

### BUSINESS VALUE

Optimize costs by paying just for what you use and scale in, out, up, and down

Reduce management overhead by undertaking AWS Managed Services

Enhance your security posture and compliance

Simplify and enhance your disaster recovery and business continuity processes

Increase business agility and time to market

Empower your business through modern application development

Make your business more sustainable

Maintain and support post-migration

## HOW DOES IT WORK?

Begin with a flexible assessment that focuses on the organization's priorities.

Use SoftServe's accelerators that help with migrations, such as:

- AWS Landing Zone customizations addressing security, compliance, and regulatory requirements.
- SoftServe's rtools2aws to better understand and optimize future AWS infrastructure costs.

Transfer your VMWare skills to AWS skills and get your team's AWS certified.

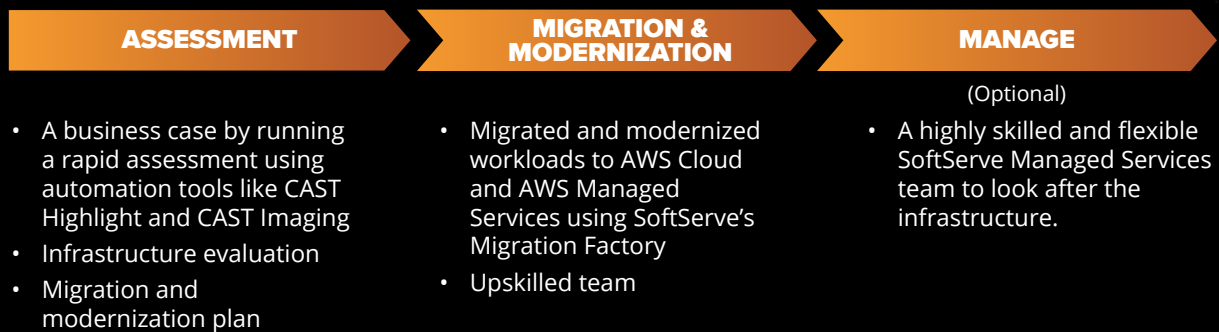

Include an optional pre-validation pilot.

Rely on SoftServe's proven Migration Factory with a safe and fast roll-back.

Benefit from comprehensive post-migration maintenance and support.

Leverage AWS funding programs to mitigate your migration investment. \*

## WHAT DO YOU GET?

**AWS funding programs for migration and modernization are available. Migration and modernization can be partially or fully covered by available funding, provided projects must meet all eligibility criteria.**

## GLOBAL AWS PARTNERSHIP

As a Premier Tier Services Partner, SoftServe is an exceptional cloud guide that vastly decreases the time to cloud value while ensuring your cloud projects are deployed within AWS Well-Architected best practices.

Our AWS clients have come to rely on our speed, agility, and scalability as a non-reseller, agnostic service provider. We can deliver end-to-end solutions to the most complex enterprise challenges-ensuring our clients achieve the most benefit from AWS investments.
